Treatment for Opioid Use Disorder: Meeting an Unmet Need with *No-Cost* MAT Waiver Trainings for PAs

EAST PROVIDENCE, May 18, 2017—Providers' Clinical Support System for Medication Assisted Treatment (PCSS-MAT), a project funded by the Substance Abuse and Mental Health Services Administration (SAMHSA), today launched its *free* 24-hour course specifically developed for physician assistants (PAs) to treat opioid use disorder. PCSS-MAT provides evidence-based trainings and educational resources to primary care clinicians.

PCSS-MAT, made up of a coalition of major healthcare organizations (see list below) led by the American Academy of Addiction Psychiatry (AAAP), is jointly providing the course with continuing education by the American Academy of PAs (AAPA). PAs are required to accumulate a specific number of continuing education credits each year.

The 24 hours of coursework, mandated by the Comprehensive Addiction and Recovery Act (CARA), is broken up into 1) an 8 hour MAT waiver training and 2) 16 hours of training for treating OUD. These courses were developed specifically for PAs. Once the 24 hours of training are completed, PAs may apply to SAMHSA for a waiver to prescribe buprenorphine, one of three FDA-approved medications for the treatment of OUD.

Many PAs have already taken the eight-hour MAT waiver course and may apply for their certificate of completion for that course toward the 24-hour requirement. All DATA 2000 organizations—including AAAP, American Society of Addiction Medicine (ASAM), American Psychiatric Association (APA), and American Osteopathic Academy of Addiction Medicine (AOAAM)—can provide the eight-hour MAT waiver course (note: some fees may apply for some courses).

For more information, go to [PCSS-MAT](#).

PCSSMAT's coalition includes: AAAP, Addiction Technology Transfer Center; American Academy of Family Practitioners; American Academy of Pain Medicine; American Academy of Pediatrics; American College of Emergency Physicians; American College of Physicians; American Dental Association; American Medical Association; American Osteopathic Academy of Addiction Medicine; American Psychiatric Association; American Psychiatric Nurses Association; American Society of Addictions Medicine; American Society for Pain Management Nursing; Association for Medical Education and Research for Substance Abuse; International Nurses Society on Addictions; National Association of Community Health Centers; and National Association of Drug Court Professionals.

PCSS-MAT is a national training and mentoring project developed in response to the prescription opioid use disorder epidemic and the availability of FDA-approved pharmacotherapies to address opioid use disorder. The overarching goal of PCSS-MAT is to make available the most effective medication-assisted treatments to serve patients in a variety of settings, including primary care, psychiatric care, substance use disorder treatment, and pain management settings.

AAPA

This program was planned in accordance with AAPA's CME Standards for Enduring Material Programs and for Commercial Support of Enduring Material Programs.

This program has been reviewed and is approved for a maximum of 8.00 AAPA Category 1 CME credits by the AAPA Review Panel. Approval is valid for one year from the issue date of 05/17/2017.

This program has been reviewed and is approved for a maximum of 16.00 AAPA Category 1 CME credits by the AAPA Review Panel. Approval is valid for one year from the issue date of 05/17/2017.

Funding for this initiative was made possible (in part) by Providers' Clinical Support System for Medication Assisted Treatment (grant no. 1U79TI026556) from SAMHSA.
